|         | <b><u>BILL NO.2</u></b>  |          |      |        |
|         | <b><u>DEMOLITIONS AND ALTERATIONS</u></b>  |          |      |        |
|         | NOTE:<br>The Tenderer is referred to the relevant Clauses in the separate document Model Preambles for Trades (1999 Edition), the Department of Public Works document No. PW 371 Specification of Materials and Methods to be used and to the Supplementary Preambles which are incorporated at the front of these Bills of Quantities.              |          |      |        |
| 1       | The alterations to the electrical and air conditioning reticulation installations shall be executed by selected sub-contractors (as elsewhere provided) and the Contractor shall be responsible for the co-ordination of such work with his own.   | Item     |      |        |
| 2       | Prices for the demolition of any portion of the structure shall include for its demolition complete with all surface finishes such as plaster, screeds, etc., all attached items of joinery such as skirtings, etc. and all reinforcement, conduit, pipes, lintels, etc. built into that portion of the structure and the removal from site thereof. | Item     |      |        |
| 3       | Prices for the removal of doors and frames shall include for the removal of fanlights, ironmongery, architraves and other associated trim.   | Item     |      |        |
| 4       | Prices for the removal of windows shall include for the removal of glass, louvres, etc. attached to the windows.   | Item     |      |        |
| 5       | The Contractor is advised to take all dimensions affecting the existing building on the site as he will be held solely responsible for all new work being of the correct size.   | Item     |      |        |
|         | <b>Carried to Collection</b>   |          | R    |        |

|                              |  |      |   |  |
|------------------------------|--|------|---|--|
| 6                            | All sizes for building up or forming openings are net and the Contractor must allow in his prices for extra labour and material, cutting and bonding new to existing brickwork, building square jambs, building cavities solid and removing old sills as necessary, and for making good junction of new plaster with old including all extra patching to work disturbed beyond the net size of the openings, which are to be formed or built up. | Item |   |  |
| 7                            | All materials and workmanship in building up, making good etc., are to match existing and where new materials abut existing, they are to be neatly joined to same.   | Item |   |  |
| 8                            | The contractor is advised to visit the site to acquaint himself with the types of construction and finishes so that he may price "to match existing" items where called for.   | Item |   |  |
| 9                            | "Making good" existing work where disturbed or damaged shall mean the provision of the necessary new material to match existing and the necessary workmanship so that a complete and perfect restoration is achieved to the satisfaction of the Architect.   | Item |   |  |
| 10                           | "Making good" where abutting walls etc. are removed shall mean the provision of the necessary material and workmanship in filling the gaps to match surrounding finishes so that a complete and perfect surface, is obtained to the satisfaction of the Architect.   | Item |   |  |
| 11                           | The rates for "taking out", "taking down" of windows, doors etc., from brickwork to remain are to include for making good all work disturbed to match surrounding finishes.  | Item |   |  |
| 12                           | Contractor to allow for removal of rubble, accumulated rubbish on site.  | Item |   |  |

### **PROFILED METAL SHEETING AND ACCESSORIES**

Profiled metal sheeting is available in various thicknesses

Usually Z275 spelter galvanising is used in inland areas and Z600 spelter galvanising for coastal areas. However galvanised sheeting is generally not used in coastal areas

When the pitch of troughed roof covering is less than 5 degrees or if dustproofing is required then the description of roof coverings "with side laps sealed" is to be used

Where roof coverings are fixed on top of rigid board insulation to purlins etc they are to be described as such

Note that besides galvanised steel, sheeting is also available in corten steel, stainless steel, copper and aluminium

0,5mm Z275 spelter galvanised corrugated sheet steel and accessories, fixed to timber purlins or rails

|   |   |    |     |
|---|---|----|-----|
| 1 | Roof covering with pitches not exceeding 25 degrees                                     | m2 | 120 |
| 2 | Ridge cap 550 mm girth three times bent and notched on site to suit roof profile.       | m  | 6   |
| 3 | Headwall flashing 375 mm girth two times bent and notched on site to suit roof profile. | m  | 17  |
| 4 | Apex flashing 550 mm girth three times bent and notched on site to suit roof profile.   | m  | 5   |

### **PROFILED METAL SHEETING AND ACCESSORIES**

Profiled metal sheeting is available in various thicknesses

Usually Z275 spelter galvanising is used in inland areas and Z600 spelter galvanising for coastal areas. However galvanised sheeting is generally not used in coastal areas

When the pitch of troughed roof covering is less than 5 degrees or if dustproofing is required then the description of roof coverings "with side laps sealed" is to be used

Where roof coverings are fixed on top of rigid board insulation to purlins etc they are to be described as such

Note that besides galvanised steel, sheeting is also available in corten steel, stainless steel, copper and aluminium

0,5mm Z275 spelter galvanised corrugated sheet steel and accessories, fixed to timber purlins or rails

|   |   |    |    |
|---|---|----|----|
| 1 | Roof covering with pitches not exceeding 25 degrees                                     | m2 | 47 |
| 2 | Ridge cap 550 mm girth three times bent and notched on site to suit roof profile.       | m  | 2  |
| 3 | Headwall flashing 375 mm girth two times bent and notched on site to suit roof profile. | m  | 1  |

### **SERVICING OF EXISTING STEEL ROOFS**

Contractors to check all flashings and roof coverings to locate leaks and allow for replacement of flashing and cleaning of existing gutters and downpipes as required.

| Roof Covering   |          |      |        |

User note

Profiled metal sheeting is available in various thicknesses

Usually Z275 spelter galvanising is used in inland areas and Z600 spelter galvanising for coastal areas. However galvanised sheeting is generally not used in coastal areas

When the pitch of troughed roof covering is less than 5 degrees or if dustproofing is required then the description of roof coverings "with side laps sealed" is to be used

Where roof coverings are fixed on top of rigid board insulation to purlins etc they are to be described as such

Note that besides galvanised steel, sheeting is also available in corten steel, stainless steel, copper and aluminium

0,5mm Z275 spelter galvanised corrugated sheet steel and accessories, fixed to timber purlins or rails

**SERVICING OF EXISTING STEEL ROOFS**

Contractors to check all flashings and roof coverings to locate leaks and allow for replacement of flashing and cleaning of existing gutters and downpipes as required.

|   |   |    |    |
